

HERCULES® Vertical Baler

THESE UNITS CAN BALE: • STRETCH WRAP • CANS • CARDBOARD • TRASH

- 73,502 lbs. of crushing force
- 30" x 48" x 60" bale
- 2,600-psi hydraulic system
- 15 hp, 208/230/460V, 3ph motor

Empty your dumpster less and save money! Environmentally friendly vertical balers can produce dense bales up to 1,100 lbs. Easy-to-operate—after waste is loaded into baler, a down stroke ram is activated which holds the waste in place until a light alerts you that there is enough to make a bale. After the bale has been tied, a door opens and ejects the bale onto a pallet for storage until pick-up. 78"W x 143"H overall. 48-second cycle time. Freight charge will include delivery, installation and a safe operation training with needed personnel. Meets or exceeds all ANSI Z245.5 standards for baling equipment. Two-year warranty on parts and labor plus a 5-year warranty on structure. FOB ALABAMA.

Model No. **33300-Q**—Wt. 5,000 lbs.

NOTE: AN ELECTRICIAN WILL NEED TO HAVE ELECTRIC SERVICE PREPARED FOR THE BALER UPON DELIVERY. ELECTRICAL REQUIREMENTS—3-PHASE SERVICE. PLEASE LET US KNOW THE INPUT VOLTAGE AVAILABLE IN YOUR BUILDING.
